

TM20

CONTINENTAL

53 HP Gasoline

■ LPG and Natural Gas Options

Standard Features

- 4 Cylinders
- Liquid-cooled OHV
- Four valve design
- Heavy-duty cast iron cylinder block and crankcase
- 6000 rpm operating point for gas and steam coils
- 100% parts interchangeability between all TM models
- HPF® valve train design
- 62 mm alternator with alternator kit
- 40 in. flywheel housing
- High volume cooling
- Full flow oil filter
- Mechanical governor
- Remote start system with vacuum advance
- Remote start plug and wire
- Maximum power output (continuous)

Your Heavy-Duty Source of Power

Setting industry standards since the turn of the century, Continental offers you specialized gas-line engines with diesel competitors. Three-cylinder and four-cylinder models offer size for choice power (range from 40 to 120).

CONTINENTAL CONSTRUCTION

Continental engines are designed for worldwide applications, and are the first choice industrial engines produced in the United States. These factory-built sources of power offer outstanding

reliability and durability for a wide variety of industrial applications.

REPAIR PARTS AND SERVICE

As part of an engine with a worldwide service network, experienced Continental representatives are always ready to meet your needs.

CONTINENTAL

72 HP Gasoline

■ LPG and Natural Gas Configurations

Standard Features:

- All-glass
- Lubricated Oil
- Powersteering
- Heavy-duty water-cooled belt and pulleys
- Belt-including belt for gas and alternator
- 10-year/100,000-mile warranty (subject to 100-hour break-in)
- High-volume water pump
- Heavy-duty alternator with internal regulator
- 100% reinforced housing
- High-volume cooling fan
- Fan belt drive
- Mechanical governor
- 1000-psi/gallon water vacuum release
- 100% quality parts and sub.
- 100% power window control

Your Heavy-Duty Source of Power

Setting industry standards above the rest of the world, Continental's new 100-hp-rated gas-line engine with diesel components, three-cylinder and five-cylinder models allow you to choose power configuration of the day.

CONTINENTAL CONFIGURATIONS

Continental engines are designed for worldwide performance, and use the best metal-internal engine produced in the United States. These heavy-duty sources of power offer outstanding

reliability and durability for a wide variety of industrial applications.

WORLDWIDE PARTS AND SERVICE

Our 100-hp engine with a worldwide service network. Experience Continental's performance and dependability for your needs.

Power Output

Continental's advanced gas turbine technology is the only engine system to continuously increase its power output as engine speed increases. Continental's 72 HP Gasoline engine produces 30 HP at 2800 RPM, 32 HP at 3000 RPM, 34 HP at 3200 RPM, 36 HP at 3400 RPM, 37 HP at 3600 RPM, 38 HP at 3700 RPM, and 38 HP at 3800 RPM. Continental's 72 HP Gasoline engine is the only engine in the world to produce 38 HP at 3800 RPM. Continental's 72 HP Gasoline engine is the only engine in the world to produce 38 HP at 3800 RPM. Continental's 72 HP Gasoline engine is the only engine in the world to produce 38 HP at 3800 RPM.

Options for Every Need

- 12V/24V electrical systems
- 12V/24V alternators
- 12V/24V batteries
- 12V/24V starters
- 12V/24V fuel systems
- 12V/24V water pumps
- 12V/24V air conditioning
- 12V/24V lighting
- 12V/24V horn
- 12V/24V wipers
- 12V/24V windshield wipers
- 12V/24V power windows
- 12V/24V power doors
- 12V/24V power seats
- 12V/24V power mirrors
- 12V/24V power windows
- 12V/24V power doors
- 12V/24V power seats
- 12V/24V power mirrors

Options are available in combination with the engine.
