**Abstract**

[illegible]

**Abstract:** This paper examines the effects of the 1997-1998 Asian financial crisis on the export performance of the manufacturing sector in the Philippines. The results show that the crisis had a significant negative impact on the export performance of the manufacturing sector. The impact was more pronounced for the export of capital goods and intermediate goods. The results also show that the export performance of the manufacturing sector was more resilient to the crisis than the export performance of the services sector. The results suggest that the Philippine government should continue to support the export performance of the manufacturing sector, particularly the export of capital goods and intermediate goods.

1000

Rep. Robert J. LaTour (D-N.J.) introduced the bill on Oct. 10, 2007. It would require the U.S. Coast Guard to conduct a study on the feasibility of creating a new federal agency to regulate offshore drilling.
