

Technical Data

WD 234 VSD TR

Performance

Overall Power (kW) with shaft drive

345 (473) 2000 / 330

Power (bhp) (kW) with shaft drive

473 (345) 2000

Power (bhp) (kW)

520 (379) 2000

Performance based on conditions listed

300 (412) 2000

All outboard motors incorporate two strokes, direct injection, sophisticated fuel and lubrication, with complete protection against cooling water contamination. The four valves, 4-cylinder, 120° crankshaft and the high-speed, low-torque 2-stroke engine are designed for maximum performance, maximum fuel economy and low maintenance requirements. The 234 VSD TR is also equipped with the Riva® remote control system for ease of use.

Accessories

Shaft drive (2.500 rpm) with gear box

Control panel
