

# GÖTA

## Marinmotorer

**NEW!!**

### GÖTA MARINE ENGINE HBE 12 HP

With HURTH HEM-35 reverse gear. Reduction 1:1, 0:0

The perfect engine for foil and smaller motor boats.

Simple design proved during many years.

Compact! Effective! Low fuel consumption.

Ideal propeller revolution. Small dimensions for building in.

A classic SWEDISH at a low price.

## DESIGN

Cylinder blocks with separate head for each cylinder are made of special cast-iron. Reinforced connecting-rod increased power and lower fuel consumption.

Cross shaft, two gears for 3-vel., made of special steel alloy.

Connecting rod of drop forging steel.

Main bearings on ball bearings.

Bottom of light metal with connecting rod rings.

Bottom manifold cast iron for inlet and outlet.

Cooling by sea water, pump of "impeller" type.

Crankcase made DMC with flame guard.

Ignition electric, 12 V system.

Ignition gear type HLRH-489221, induction L.C.C. start and very easy to operate.

Clutch between engine and gear is provided with a dampener. There is also connection for driving auxiliary generator or pump.

Indication of engine by means speedometer.

Manow water cooled glass oil level indicator.

Electrical equipment delivered with all engine includes 12 V starter generator with electric constant speed with a couple for electric fuel valve, igniter coil, control lamp and starter motor.

Engine fuel bearing. All engines have fuel 12V 12V.

Guarantee 1 year for material and construction.
