# MARINE POWER'S RUGGED SPORTPAC ENGINES. NOW IN STANDARD, PREMIUM AND PERFORMANCE SERIES.

Along the Louisiana Gulf Coast, Marine Power's reputation for reliable, long-lasting engines dates back 25 years. Commercial fishermen andologists credit the best Marine Power engines designed to meet the rugged demands of their industry.

Today, sportmen and recreational boaters across the country have discovered the same level of quality in Marine Power's complete line of engines. They get the same unsurpassed durability. A long list of awarded boaters, anglers and divers.

Perhaps that's why more and more pleasure boat buyers are adding their boaters for Marine Power engines. Marine Power's Sportpac engine line gives boaters three series to choose from: Standard, Premium and Performance.

Each is engineered with state-of-the-art design technology, including our advanced CARBAM system. The engines are then passed through a grueling 25-point inspection test — a tradition that allows Marine Power to back its engines with an impressive warranty — a full two year, unlimited miles.

Look over Marine Power's extensive line of back-working engines and high-power boaters. You'll see why Marine Power is becoming a major force in the recreational marine engine industry...the force behind the fun.

# SPORTPAC

**181**

Standard and  
Performance Series

Big things come in little packages, and Marine Power's 181 is the perfect example. It's built for durability and reliability, just like its big brother.

Both the Standard and Performance Series 181 sport electronic ignition for low-speed economy and smooth idling. Our new 181 manifold combines the latest

in advanced airflow design and a corrosion-resistant material that's hard to bow. Plus, it's 50 pounds lighter than the competition! And, it's designed with twist-off trim to make it adaptable to most popular applications.

It's the smart choice from the company who offers you more choices.

# SPORTPAC

Can't replace your dead 4.6 because there's not enough room? Marine Power has the answer with the new "old favorite" 250.

Marine Power's 250 Sportpac delivers 85 crankshaft horsepower at 4000 RPM. Standard features include heavy-duty alternator, wet-wet pump package and

Mercury compatible manifolds. Plus, we're improved it with electronic ignition, and added convenience like remote disconnect plug on the engine wiring harness.

And Marine Power backs them up with a two-year warranty.

Make the right choice from the company who offers you more choices.

**350**

Standard, Premium  
and Performance Series

There's more pleasure in family pleasure boating with Marine Power's Standard 350. It delivers every low performance inch develops 94.1 ft. lbs. full torque at only 1800 RPM and keeps this efficiency across 67% of its entire RPM range.

The Premium 350 packs more value in a small block, with heavy-duty connecting rods and lightweight alloy cylinder heads.

And even Performance Series 350 overblows value, economy and performance that's perfect for those who want all they can get in a small block installation. You get big block performance in a small block package.

No matter what price or series you choose, it's one of the best values on the market today.

## 454

Maximum Premium  
and Performance  
Series

When you're on your way to the good life and cruising is part of it, Marine Power's 454 is "the force behind the fun." It can perform everything in its class with incredible, non-stop power.

The Marine Power 454 Standard is the motor industry's choice for mid-size cruisers, all-abilities and convertibles. It delivers 160 Dynaford horsepower and is one of our best values. The Premium 04

gives real meaning to the term "heavy duty" — forged steel crankshaft and heavy-duty connecting rods that power up into a higher RPMs — and the brand new MOSE system. The Performance 454 cranks up the power even higher to 180 Dynaford horsepower.

For power that won't let you down, make it your choice, too.

## 502

Premium and Performance Series

Step-up a little in life. You can afford it. You're used to chairs. And Motor Power offers you more with the 502 Premium or Performance Series.

With heavy-duty components and systems to ensure longer engine life like the trademark MAGE systems, the 502 Premium is the perfect choice for those of you who qualify in deep, blue water, or those of you who cruise with a little more style and elegance. The 502 Premium combines

over 400 horsepower of torque over 50% of its RPM range.

For those of you who want the ultimate production machine, the 502 Performance pumps an incredible 40hp horsepower from 500 to 1300 RPM with modified cylinder heads and valve operations.

Not everyone needs this equipment, but you're not everyone. If you want it, Motor Power 502's got it.
