

MerCruiser Performance Products 1990

There's A Fast Lane Out There. We Happen To Own It. The HP 575.

It's quite simple. Only our production engines have passed more rigorous on-the-track checks than all others combined.

So why waste the time down the backlot your operational — the one that runs your business. Call CATERPILLAR. It's as close as you can get to a straight ahead race engine.

It takes over 60 man hours to transform a Chevy "Small-Block" block

into an HP. We machine the block ourselves, then hand turn the cylinders and the firing pin. We hand turn the crankshaft, connecting rods, and forged steel pistons. We hand turn the LA compression rings and the crankshaft. We hand turn the oil pump and the timing gear. We hand turn the oil pump and the timing gear. We hand turn the oil pump and the timing gear.

premium quality steel. Each with a heavy-duty 1000000 psi and 1000000 psi. Each with a heavy-duty 1000000 psi and 1000000 psi. Each with a heavy-duty 1000000 psi and 1000000 psi.

This power engine has an output of 1000000 psi and 1000000 psi. This power engine has an output of 1000000 psi and 1000000 psi. This power engine has an output of 1000000 psi and 1000000 psi.

The Most Rapid Advancement In Stern Drive Technology. The HP465.

What you're looking at is nothing short of a revolution in the boating industry: a power for 180 horsepower, 500,000 engine hours and our brand-new drive, which accommodates the new drive in hydraulic transmission. So this will 180-horsepower drive engine and while saving 100 lbs. in weight.

This is no off-the-shelf engine. It's hand-built for maximum performance and durability. High quality components are used throughout. Star-Cruiser aluminum roller master arms, heavy duty roller chain components and high performance cam. A-Holley 440 cubic carburetor. And Counter-Cruiser exhaust system.

Each engine has critical tolerances machined, hand-crafted techniques. These are important to MerCruiser's Heavy-Duty Stern-Drive drive with high speed gear sets.

This is just a stern drive system. With the perfect choice for boaters who require superior performance. To find out more, turn to page 1.

Make Sure Your Choice Of Stern Drives Is A Fast Decision. The HP 425.

Each HP outboard motor, including the HP 425, is built using a single hole design, plate by plate, using high quality components including: forged roller rocker arms, heavy-duty offset pushrod and high-carbon steel valves, intake and exhaust valves and valves, forged steel connecting

rod ends and integral cast integral aluminum pistons. The resulting outboard is a cast-iron block without wasteful aluminum weld spots. And it's built on.

The technology that made the engine lightweight aluminum motor, Cresskill, New York, making

it lighter. It's a perfect choice for a boat with 1000 lbs. or more weight.

The HP 425 is the only outboard with the outboard TBI drive unit, a 1000, 1500 or 2000, if you prefer to use these units, turn to the specs on page 7.

[illegible]

These Specs Show Our Powerful Commitment To High

Introducing Our New V-8 5.0L Drive.

From the outside it looks just like the Mustang V-8 5.0L. But appearances can be deceiving. The V-8 5.0L has been toughened and upgraded from 1991 to deliver 1000 horsepower at 5000 R.P.M. So, if torque, horsepower and top-to-bottom performance at all critical changing points, that's the name of it. Because the V-8 5.0L is independent, in fact, Mustang V-8 5.0L drives powered the 500s that won both the Acura national open-off-road class championships and the FORMULA V-8 national championships in 1995.
