

WE130

WISCONSIN HEAVY-DUTY INDUSTRIAL

3 HP Gasoline

NEW

Standard Features

- Forged steel crankshaft
- Die cast aluminum cylinder
- Cast-iron cylinder head
- Forged aluminum connecting rod
- Compression mechanism for easy starting
- Ball bearings at each end of crankshaft
- Multi-point carburetor with air filter screen
- Foot pedal on design
- Foot pedal without valve
- Replaceable valve guides
- Ball bearing

Your Heavy-Duty Source of Power

Setting industry standards since 1925, Wisconsin continues to offer you a wide selection of air-cooled gasoline engines. Seven models allow you to choose from single-cylinder and twin-cylinder engines with power ranging from 1.5 to 15 HP.

WISCONSIN CONSTRUCTION

Wisconsin engines are designed to provide long applications that require durability and long life reliability.

WISCONSIN PARTS AND SERVICE

We back our engines with an unbeatable service network. Experienced Wisconsin representatives are always ready to help you find the right engine.

Abstract

1000

[illegible][Back to top](#)

Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and blood pressure (BP) of sedentary, middle-aged men. The subjects were divided into two groups: a control group and an exercise group. The exercise group performed a 12-week training program consisting of three sessions per week, each lasting 30 minutes. The control group did not exercise. HR and BP were measured at baseline and at the end of the 12-week period. The exercise group showed a significant decrease in both HR and BP compared to the control group. The results suggest that a 12-week training program can effectively reduce HR and BP in sedentary, middle-aged men.

NEW

WE180 WISCONSIN HEAVY-DUTY INDUSTRIAL

5 HP Gasoline

Standard Features:

- Integrated control
- Vertical aluminum construction
- Cast iron cylinder liner
- High-strength connecting rod
- Two compression mechanisms for startability
- Full bearing-throw end of crankshaft
- Dual valvetrain mechanism with steel tie rods
- Dual element air cleaner
- Steel-reinforced exhaust valve
- Replaceable valve guides
- Solid valve system

Your Heavy-Duty Source of Power

Setting industry standards since 1918, Wisconsin continues to offer you a wide selection of all-terrain/gasoline engines. From standard size, you can choose from single cylinder and two-cylinder engines with power ranging from 1 to 100 HP.

WISCONSIN CONSTRUCTION

Wisconsin engines are designed for those tough applications that require durability and long life expectancy.

WISCONSIN PARTS AND SERVICE

For more on our engines with a worldwide service network, experienced technicians, representative, call ahead ready to meet your needs.

Standard Features

- forged steel crankshaft
- 24-valve aluminum pistons
- Cast iron cylinder liner
- forged aluminum connecting rod
- decompressor mechanism for easy starting
- full coverage of rear end of crankshaft
- full coverage of cylinder with electric heater
- full coverage of crankcase
- heat-treated exhaust valve
- high-strength valve guides
- full coverage of oil pan

Your Heavy-Duty Source of Power

Being industry manufacturers, WISCONSIN continues to offer you a wide selection of diesel and gasoline engines. These models allow you to choose from single-cylinder and four-cylinder engines with power ranging from 1/2 to 100 HP.

Wisconsin (Wiscon) Sales

Wisconsin engines are designed for those tough applications that require absolutely superior life expectancy.

Abstract: Polymers with a large number of functional groups are used in a wide variety of applications. The synthesis of polymers with a large number of functional groups is a challenging task. This paper describes the synthesis of polymers with a large number of functional groups using a novel method. The method involves the use of a large number of functional groups in the synthesis of polymers. The polymers are then used in a wide variety of applications. The results of the study are presented in the following sections.

1999	1.00	1.00
2000	1.00	1.00
2001	1.00	1.00

- **Chlorophyll** - photosynthesis
- **Stomata** - pores on leaf surface
- **Guard cells** - control stomata
- **Transpiration** - loss of water
